EMPLOYMENT AND EXPERIENCE

AIX SYSTEM ADMINISTRATOR, IBM CSDL — MAR. 2008- MAR. 2011

Working in IBM China Software Developing Laboratory, DB2 Federation System Team. Responsible for maintenance environment for both developing and testing.

A DB2 federation system is a special type of distributed database management system (DBMS). A federated system consists of a DB2 instance that operates as a federated server, a database that acts as the federated database, one or more data sources, and clients (users and applications) that access the database and data sources. With a federated system, user/application can send distributed requests to multiple data source within single SQL statement.

There are 3 parts of the Environment works

- Design, implementation and maintenance of local Dev/QA Servers, including AIX, Solaris, HP-UX, Linux and Windows (2003 32bit, 2003 64-bit, 2008, Windows 7);

*I maintenance more than 60 servers, the routine work including planning, installing, configuring, updating and maintenance of the systems and software, assist DEV/QA teams with technical issues, dealing with their changing request, working with testers and developers identify and implement strategies that can improve their environments.

- Software Configuration Management:
- Data Source management

SYSTEM ENGINEER, CHINA NATIONAL SOFTWARE & SERVICE COMPANY LIMITED — JUL. 2003- MAR. 2008

Working in Technical Service Department. Responsible for customer facing service, providing service for IBM eServer System i, System p, including hardware/system maintenance, system integration and so on.

Providing onsite and offsite services to customers, diagnosing customer issues on software and hardware, determining solution and taking actions to resolve the issue, have a lot of experiences working with 24x7 technical support environment (Banks and insurance companies).

EDUCATION

FRENCH, GROEPT, LEUVEN BELGIUM — SEP. 2011-FEB. 2012

Language course, basic French level 1

MASTER OF ENGINEERING IN SOFTWARE ENGINEERING (ON-JOB POSTGRADUATE), COLLEGE OF COMPUTING & COMMUNICATION ENGINEERING GRADUATE UNIVERSITY OF THE CHINESE ACADEMY OF SCIENCE — MAR. 2006-OCT. 2009

Modules included:

- The Design and Analysis of Computing Algorithms 62%
- Database Technology and Practice 60%
- Computer System Architecture 72%
- Object Oriented Design Patterns 66%
- Computer Networks 80%
- English 72%

- Natural Dialectic 92%
- English of Software Engineering 68%
- Software Engineering Process for High Quality Software 70%
- Software Requirements Analysis and Design in Practice 77%
- Software Project Management 85%
- Middleware-Technology for Enterprise Software 80%

**BACHELOR OF ENGINEERING IN AUTOMATIC CONTROL, BEIJING INSTITUTE OF TECHNOLOGY —
SEP. 1999-JUL. 2003**

COMPUTING SKILLS

- **Operating Systems:**
AIX (5+ years experience)

Certified for

IBM Certified System Administrator (AIX 6.1 Administration)

A strong understanding of AIX and its administration on Power Systems servers. Familiar with install AIX and configure a system, understand and manage LPAR and virtualization technologies (including VIO), manage AIX and system updates and fixes, storage, networking, and system security.

Solaris, HP-UX, Linux (2+ years experience) Linux (Redhat & Suse, platform including IA32, IA64, PPC and zlinux)

Basic knowledge in operating system management.

- **Programming Languages:** SHELL, SQL, Java
- **Database:** IBM DB2 Universal Database, MySQL
IBM Certificated DB2 UDB Administrator(700,701)

LANGUAGE ABILITY

Fluent in English

Native in Mandarin

Basic in French
